Navigator, Weather, Marine Maintenance and Marine Electronics are not being offered this training year. The reason for this being insufficient numbers in the classes. A consensus of opinion from instructors, past & present indicates it is not practical unless a class of five or more can be arranged. These courses will be offered again next year.

One class is currently underway for Instructor Training & another to commence in Jan. with Carol Quartermain as instructor.

All the classes listed above are in full session & progressing enthusiastically. In the Boating Courses we have 116 enrolled in Richmond & 98 enrolled in Ladner for a total of 214. This 79/80 Training season shows an increase of well over 30% from the past two or three years.

Our training staff this year numbers 45 members, this included training officers, instructors, proctors & assistants on a reg. basis but does not include guest speakers, occasional assistants or any other assistance outside C.P.S. membership.

A tremendous vote of thanks and appreciation to all those actively supporting Fraser's Training program & especially to Bruce Bell from Van. Squadron who is helping us in Rich. as a boating instructor.

I will have another report next issue. Anyone wishing to contribute to these reports pls. contact me anytime.

Respectfully submitted,

Lt/C Stan Dickinson

October's Meeting

Our "mix and mingle Octoberfest" which was held on Oct. 26th at the Town & Country Inn turned out to be a great success. Thanks to this enjoyable evening, many of us are now able to attach names to the familiar faces of our fellow members.

The big surprise of the evening turned out to be a Commander's quiz. This quiz was both informative and extremely valuable in establishing the tone for the theme of "Getting to Know You".

I'm sure we all look forward to reinforcing these new friendships and establishing many more new friendships throughout our future meetings.

A special thanks is extended to all those who worked so hard to make this past meeting such a delightful one.

BOOKS

Practical Weather Forecasting \$7.95
By Frank M. Christie

The author clearly demonstrates how it is possible to relate the evidence around and above us to factors which affect, or are going to affect the weather.

Very comprehensive book. Well illustrated, numerous color photos of cloud formations, excellent explanation and diagram on 'apparent wind'.

& SECOND LOOKS

Scuba diving may harm unborn

According to a Texas researcher, scuba or skin diving is likely to severely harm fetuses in pregnant women. It's a serious matter, for the number of women divers is increasing at 20% a year. Experiments with sheep, which are more resistant to the bends than humans, showed that in dives over 60 feet the risk of harming the fetus, perhaps fatally, is high.
